The diagram shows a 24-pin connector. The first 12 pins are labeled in green as FO1 01, FO1 02, FO1 03, FO1 04, FO1 05, FO1 06, FO1 07, FO1 08, FO1 09, FO1 10, FO1 11, and FO1 12. The remaining 12 pins (13-24) are not labeled. Each pin is represented by a vertical rectangle with a small circle at the top and bottom, and a larger rectangle in the middle.

The diagram illustrates the XS2 network topology, showing 24 nodes arranged in three groups of eight. Each node is represented by a box containing a label (e.g., XS2.13 A) and a corresponding network diagram below it. The network diagrams show a hierarchical structure with a central switch and multiple access ports. The nodes are numbered 1 through 24.
